

## How to Configure Wi-Fi for Single Sign-On using WPA

1. Go to the website <https://wifilogin.iitk.ac.in/>, and create a password for Single Sign-On Wi-Fi access.
  - a. Click on “New Users”.
  - b. Login with CC user credentials.
  - c. Then create a password for Single Sign-On Wi-Fi access.

**(Note: username will remain same as CC username)**

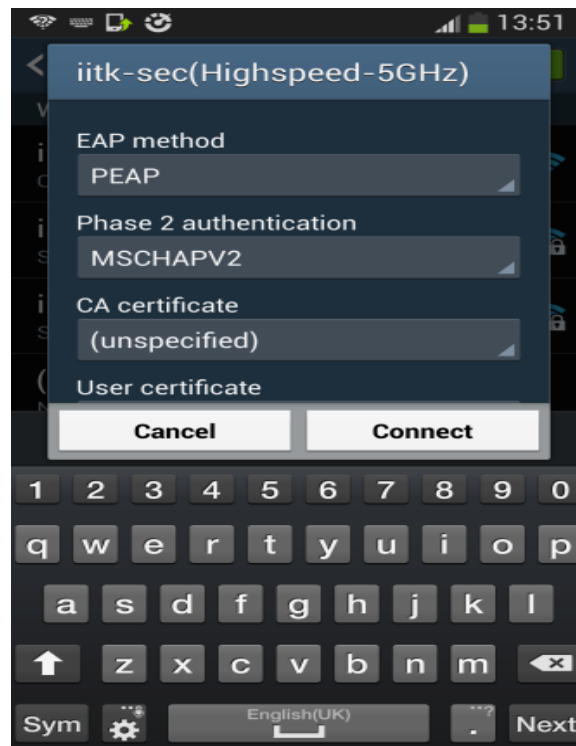

The same website can also be used to change the Single Sign-On Wi-Fi password.

2. Use SSID **iitk-sec** or **iitk-sec(Highspeed-5GHz)** to access Single Sign-On Wi-Fi seamlessly across the entire campus. The **iitk-sec** SSID supports both 2.4 GHz and 5 GHz whereas **iitk-sec(Highspeed-5GHz)** supports only 5 GHz.

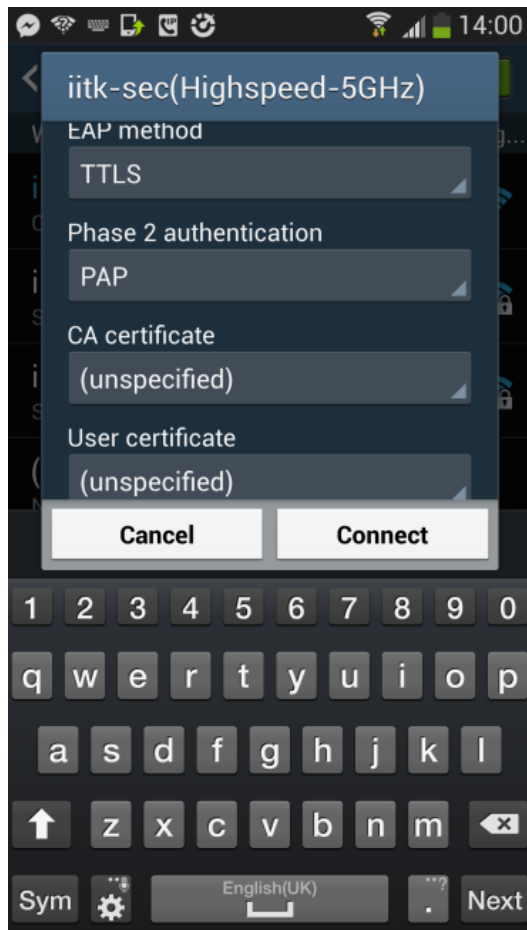

When you connect for the first time, you will be prompted for a username and password. You should use your username and Single Sign-On Wi-Fi password for the same.

### For Android Mobiles, Please Follow Following Steps

1. Select EAP method “PEAP” and “MSCHAPV2” as Phase 2 authentication.

If EAP method “PEAP” not available in list, use “TTLS” as EAP method and “PAP” Phase 2 authentication.

2. Fill "username" in identity and "Single Sign-On Wi-Fi password" in password field.
