

## Continuous Flow Stirred Tank Reactor

- **New Brunswick Scientific - Bioflow 115**
- **Grows virtually any cell type** -aerobic and anaerobic microbes, yeast, insect, plant and mammalian cells.
- **Heat-blanketed auto-clavable glass vessel of 3.0 Liters** (with cooling water coil inside the vessel)
- **Pre-programmed with both fermentation and cell culture operating modes**
- **Four-gas mix option** in cell culture mode
- **Two-gas mixing option** in fermentation mode
- **Adjustable P-I-D values** for pH and DO
