Ongoing Projects:

Currently, I am working on a project titled, “Investigating the Lateralization of Attentional Processes” where I am looking at the extent of left vs. right hemisphere involvement in attentional processes as inhibition, temporal attention, spatial attention, executive attention etc.

Also, I have submitted a DST Project, titled, “Investigating Visual Word Recognition in Hindi”, wherein I will be conducting behavioral & eye-tracking experiment on Visual Word Recognition in Hindi.

Finally, I am looking for people interested in building a word corpus for Hindi, on which will have parameters like word-frequency, familiarity etc.

Interested & qualified candidates for any of the above areas are welcome to contact me for PhD or Research Assistant/J.R.F. positions.
