**Research Areas of Sohini Sahu**

**Broad field:** Macroeconomics

**Specific topics:** Dynamic Stochastic General Equilibrium (DSGE) models, Growth models, Real business cycle theory, New Keynesian models, Applied Macroeconomics.

My research looks into the various aspects of growth in a developing economy. The various sources of growth and fluctuations (recessions), the role of liberalization policies, the channels through which the policies are transmitted etc. are some of the topics of interest.

**Students with similar research area:** Ms. Saakshi Jha (PhD candidate) and several UG (Economics) students.
