

KARMAA Technologies - Modeling the World

KARMAA (Knowledge Acquisition Retention Management Assimilation and Application) was conceived to provide knowledge solutions to industry using cutting edge technology available in engineering and science. KARMAA is a suite of algorithms available for a number of applications. The suite includes proven algorithms from Computer Science, Artificial Intelligence, Machine Learning, Neural Networks, Fuzzy Systems and Electrical Engineering. A consequence of more than a decade of continuous research and development at one of India's premier institute, KARMAA Technologies brings together the bunch of techniques that you would need.

KARMAA Technologies is presently interested in providing services to industry and R&D Institutions in the following areas:

- Biometrics & Security Systems
- Finance & Stock Trading
- Drug Research & Bioinformatics
- Space & Defence Research
- Power Systems
- Critical Fault Detection Technology
- Data Centers
- Manufacturing and Industry Automation
