

## Four Years Bachelor of Science (BS) Program in Mathematics & Scientific Computing

---

From the academic session 2011-12-I semester, IIT Kanpur will be offering four years Bachelor of Science (BS) programs in the following disciplines: (i) Chemistry; (ii) Economics; (iii) Mathematics & Scientific Computing, and (iv) Physics. Admissions to BS programs will be made through the Joint Entrance Examinations (JEE) after XII standard. The BS programs in sciences are in the same spirit as B.Tech programs in engineering. These kind of 4-years BS programs are very common in the western countries.

With the inception of four years BS programs, IIT Kanpur will now only offer entry to a four years program (BS or B.Tech) at the time of admission through JEE. However while pursuing BS programs students will have the following options available to them: (a) to go for a double major; i.e., getting two undergraduate degrees (both BS or one BS and one B.Tech) from two different departments at the same time; (ii) to change 4-year BS program to a 5-years BS/MS program in the same discipline; (iii) to follow the 4-years BS program with an M.Tech/MBA/M.Des program. These options are subject to availability of seats and the academic performance of the student. Moreover exercising any of these options will extend the total duration of program(s) to five years.
