

## UV-vis NIR spectrophotometer with in-situ capabilities

### Important Features

- Spectrophotometer equipped with a **reaction cell with 10 cm path length**
- **Measure beyond 8.0 absorbance** units
- **Measure 175 to 3300 nm**
- **Maximum light throughput** using Schwarzschild coupling optics for higher accuracy at low transmission levels
- **Minimal noise and stray light**

### Location:

Department of Chemical Engineering  
IIT Kanpur
