

A Short Biography for Youngho CHANG

Dr Chang is a Senior Lecturer at the School of Business, the Singapore University of Social Sciences (SUSS), Singapore. He specializes in the economics of climate change, energy and security, oil and macroeconomy, the economics of electricity market deregulation, and education for sustainability. He has published his research output in internationally referred academic journals such as *Energy Economics*, *Energy Policy*, *Resources Policy* and *Econometrics Journal* along with many book chapters and conference proceedings. He has also published a few edited books such as *Education and Sustainability* (Routledge), *Energy Conservation in East Asia* (World Scientific), *Energy and Non-Traditional Security (NTS) in Asia* and *Rethinking Energy Security in Asia* (Springer). As a consultant, he has carried out a few cost-benefit analyses that examined the economics of carbon emissions reductions, market power in the deregulated electricity market, forecasting global demand for methanol, and the impact of carbon control on operations and supply chain. He has conducted training sessions on the deregulation of electricity market for a generation company. Before working in the academy, he worked as a landscape architect for two years in Korea and Saudi Arabia, and a financial analyst for four years in Korea. He received his Ph.D. in Economics (Environmental and Resource Economics) from the University of Hawaii at Manoa, U.S.A.
