EE623A Term Paper

April 22nd (Last day of classes) is the submission deadline for the term paper. The weightage for various components is as follows

- Presentation - 15%
- Relevance, novelty and level of challenge of topic - 15%
- Breadth of work - 30%
- Quality/ depth and novelty of results - 30%
- References and summary - 10%

Please limit yourself exclusively to detection and estimation related issues. The term paper will receive a higher overall evaluation if the references and research are recent and the topic chosen is challenging. Base your work on several good references. A good term paper presents a well-rounded study of various aspects of a broad challenging research problem. Typical term paper is around 5-6 pages.

Please do term paper in groups of two students only and use the standard IEEE conference format below
