

## Closing remarks

Roberto Meli

On behalf of the Mexican Society for Earthquake Engineering I express my most sincere thanks to the National Delegates of IAEE for having chosen our country for the next World Conference on Earthquake Engineering. I can assure you that the very active community of earthquake engineers in Mexico will dedicate its greatest effort to make of the 11WCEE a successful event and to offer to all participants the warmest hospitality.

We will certainly make use of the experience of the organizers of this excellent Conference and of the most prominent members of IAEE to design a program that will make of the 11WCEE a most useful and enjoyable event.

See you in Acapulco 1996.
