

# ORGANIZATION OF PROCEEDING VOLUMES ACCORDING TO TOPIC AREAS

## Volume I

- 1. SEISMIC RISK AND HAZARD** **1**
  - 1.1 Regional Seismic Hazard Analysis 5
  - 1.2 Seismic Hazard Analysis Models 189
  - 1.3 Seismic Risk Analysis 311
  
- 2. REPAIR, STRENGTHENING, AND RETROFIT OF STRUCTURES** **441**
  - 2.1 Reinforced Concrete Construction 441
  - 2.2 Masonry Construction 565
  - 2.3 Historical Buildings 607
  - 2.4 Bridges 633
  - 2.5 Special Problems 667
  
- 3. DEVELOPMENT AND ENFORCEMENT OF SEISMIC CODES AND STANDARDS** **709**
  - 3.1 General and National Codes 713
  - 3.2 Code Comparison and Analysis 763
  - 3.3 Material Provisions 805

## Volume II

- 4. GROUND MOTION AND SEISMICITY** **1**
  - 4.1 Strong Motion Networks, Data Acquisition, and Data Base 5
  - 4.2 Strong Motion Data Processing 101
  - 4.3 Analysis of Strong Motion Array Data 149
  - 4.4 Ground Motion Attenuation 255
  - 4.5 Seismological Aspects of Strong Ground Motion 351
  - 4.6 Probabilistic Models of Strong Ground Motion 489
  - 4.7 Theoretical Studies of Local Effects 637
  - 4.8 Effects of Local Geologic Conditions on Strong Ground Motion 711
  - 4.9 Earthquake Intensity Characterization 817

### Volume III

- 5. SOIL STABILITY, SOIL STRUCTURE INTERACTION, AND FOUNDATIONS** **1**
- 5.1 Dynamic Properties and Liquefaction Behavior of Soils 5
  - 5.2 Embankment Dams, Natural Slopes, and Retaining Walls 291
  - 5.3 Deep Foundations and Underground Structures 541
  - 5.4 Soil Structure Interaction 719

### Volume IV

- 6. RESPONSE OF STRUCTURES** **1**
- 6.1 Response Spectra and Input Motions 5
  - 6.2 Analytical Procedures 153
  - 6.3 Analysis of Building Structures 507

### Volume V

- 6. ANALYSIS OF STRUCTURES (CONTINUED FROM VOL. IV)** **1**
- 6.4 Analysis and Behavior of Non-Building Structures 4
- 7. DESIGN OF STRUCTURES AND STRUCTURAL COMPONENTS** **333**
- 7.1 Design of Frame-Type Buildings 337
  - 7.2 Design of Shear Wall-Type Buildings 531
  - 7.3 Structural Analysis 693
  - 7.4 Material and Structural Element Behavior 795
  - 7.5 Base Isolation and Mechanical Systems for Response Reduction 925
- 8. NON-STRUCTURAL SYSTEMS AND BUILDING CONTENTS** **1071**
- 8.1 Hazard Evaluation and Human Response 1075
  - 8.2 Building Components and Equipment 1117
  - 8.3 Components in Non-Building Structures 1187

### Volume VI

- 9. EXPERIMENTAL METHODS AND TESTS OF STRUCTURES AND COMPONENTS** **1**
- 9.1 Experimental Methods—Test Excitation Instrumentation, Data Acquisition, and Measurement Evaluation 5
  - 9.2 Tests of Steel Frames and Components 151
  - 9.3 Tests of Reinforced Concrete Shear Walls, Slabs, and Frames 289
  - 9.4 Tests of Reinforced Concrete Joints and Flexural Members 411
  - 9.5 Tests of Reinforced Concrete Columns 509
  - 9.6 US-JAPAN Co-operative Research Program: Tests of Reinforced Concrete Structures 593
  - 9.7 Tests of Pre-cast and Prestressed Concrete Structures 707
  - 9.8 Tests of Masonry and Low-Cost Housing Structures 789
  - 9.9 Tests of Equipment and Structures Other Than Buildings 871

## Volume VII

<b>10. SPECIAL STRUCTURES AND CRITICAL FACILITIES</b>	<b>1</b>
10.1 Special Structures 5	
10.2 Power Generation and Transmission 111	
10.3 Pipelines 197	
10.4 Dams 317	
10.5 Storage Tanks 383	
<b>11. LIFELINES—UTILITY, TELECOMMUNICATION, AND TRANSPORTATION SYSTEMS</b>	<b>461</b>
11.1 Water and Sewage 465	
11.2 Telecommunication 515	
11.3 Transportation 533	
11.4 Lifeline Risk Analysis 573	
<b>12. URBAN DESIGN, SOCIOECONOMIC ISSUES, AND PUBLIC POLICY</b>	<b>609</b>
12.1 Urban Vulnerability Studies 613	
12.2 Urban Planning for Hazard Mitigation 695	
12.3 Reconstruction Planning 809	
12.4 Risk and Public Issues 883
